3. Close supervision is necessary when any appliance is used by or near children. Children should be supervised to ensure that they do not play with the appliance.
4. To protect against risk of electrical shock, do not put cord, plug, base, or motor in water or other liquid.
5. Unplug cord from outlet when not in use, before putting on or taking off parts, and before cleaning.
6. Avoid contact with moving parts.
7. Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions, or is dropped or damaged in any manner. Call our customer service number for information on examination, repair, or electrical or mechanical adjustment.
8. The use of attachments, including canning jars, not recommended or sold by the appliance manufacturer may cause a risk of injury to persons.
9. Do not use outdoors.
10. Do not let cord hang over edge of table or counter or touch hot surfaces, including stove.
11. Keep hands and utensils out of blending jar while blending to reduce the risk of severe personal injury and/or damage to blender. A rubber spatula may be used but must be used only when blender is not running.
12. Blades are sharp; handle carefully—especially when assembling, disassembling, or cleaning inside blending jar.
13. Do not use a broken, chipped, or cracked blending jar.
14. Do not use broken, cracked, or loose cutting blade assembly.
15. To reduce the risk of injury, never place cutting blade assembly on base without blending jar or grinding cup properly attached.
16. Always operate blender with lid in place.
17. Do not blend hot liquids in the travel jar.
18. Ensure collar on base of travel jar, and are tight and secure. Injury can result if moving blades accidentally become exposed.
19. If the jar should twist or rotate when the motor is switched ON (I), switch OFF (O) immediately and tighten jar in collar or on blender base.
20. Do not leave blender unattended while it is operating.
21. Before plugging cord into wall outlet, turn the control to OFF (O). To disconnect cord, turn the control to OFF (O). Then remove plug from wall outlet.
22. Do not use appliance for other than intended purpose.
23. Do not place on or near a hot gas or electric burner or in a heated oven.

SAVE THESE INSTRUCTIONS!

Other Consumer Safety Information

This appliance is intended for household use only. Use for food or liquids only.

The length of the cord used on this appliance was selected to reduce the hazards of becoming tangled in or tripping over a longer cord. If a longer cord is necessary, an approved extension cord may be used. The electrical rating of the extension cord must be equal to or greater than the rating of the appliance. Care must be taken to arrange the extension cord so that it will not drape over the countertop or tabletop where it can be pulled on by children or accidentally tripped over.

Wattage/Peak Power Information

The wattage/ampere rating of the blender is determined by an Underwriters Laboratory test and is based on available cutting blade assembly, jar combinations, and attachments that may not be provided with your unit, but are available as replacement parts. This is a measure of input wattage/amperes after 30 seconds of operation. The blender as provided may draw significantly less power.

Peak power is the measure of the motor wattage during the first seconds of operation. This is when a blender requires the most power to crush ice, frozen fruit, etc. This is a better measure of what a blender motor can consume when power is needed most.

If the cutting blade assembly locks and will not move, it will damage the motor. Do not use. Call the customer service number for information.

Do not place blending jar in the freezer filled with food or liquid. This can result in damage to the cutting blade assembly, jar, blender, and possibly result in personal injury.

BEFORE FIRST USE: After unpacking blender, wash everything except blender base in hot, soapy water. Dry thoroughly. Wipe blender base with a damp cloth or sponge. **DO NOT IMMERSE BASE IN WATER.** Care should be taken when handling cutting blade assembly as it is very sharp.

Parts and Features

BEFORE FIRST USE: After unpacking the blender, follow the instructions in "Care and Cleaning."

Using the Travel Jar

⚠️ WARNING Burn Hazard.

Do not blend hot ingredients. Pressure may build, causing jar to pop off and hot ingredients to erupt.

⚠️ WARNING Laceration Hazard.

Handle blades carefully; they are very sharp. Make sure unit is turned OFF (O) and is unplugged.

Add ingredients to travel jar. Carefully place cutting assembly and collar onto travel jar.

Turn travel jar upside down and place onto base.

Hold jar in place while blending. Plug into outlet. Press **ON (I)** or **PULSE** to blend 60 seconds or until smooth. Always operate on a countertop or other supporting surface.

Turn bottom up; remove collar and cutting blade assembly from jar. Hand-tighten drinking lid onto travel jar.

Blending Tips for the 16-oz. Travel Jar

- For best performance in the 16-oz. travel jar, the minimum amount of liquid needed per recipe is 3/4 cup (6 ounces/177 ml).
- Do not chop or process hard foods such as cheese, crackers, or meat.
- If blending action stops during blending or ingredients stick to sides of the jar, turn blender OFF (O). Remove jar, collar, and blade and use a narrow rubber spatula to stir.
- Do not process hot foods or liquids in travel jar.
- Avoid bumping or dropping the blender.
- If blender stops working, unplug and allow 15 minutes before using. Plug into outlet to start blending.

Blending Drinks

TIPS FOR BEST RESULTS:

- Always place liquid in blending jar first, then remaining ingredients.
- If ice is not blending, stop blender and pulse a few times.

Care and Cleaning

⚠️ WARNING Electrical Shock Hazard.

Disconnect power before cleaning. Do not immerse cord, plug, base, or motor in water or other liquid.

Wipe blender base, control panel, and cord with a damp cloth or sponge. To remove stubborn spots, use a mild, nonabrasive cleanser.

DO NOT use the "SANI" setting when washing in the dishwasher. "SANI" cycle temperatures could damage your product. Parts may also be washed with hot, soapy water. Care should be taken when handling the cutting blade assembly as it is very sharp. Rinse and dry thoroughly. Do not soak.

EASY CLEAN: To Easy Clean, pour 3/4 cup (177 ml) warm water into 16 oz. jar and add 1 drop liquid dishwashing detergent. Press **ON (I)** and blend for 10 seconds. Discard soapy water. Rinse with clean water.

This is not a substitute for regular cleaning as instructed in "Care and Cleaning."

Easy Clean should only be used to rinse the blender between batches of processing the same food. When the processing of a single type of food is finished, the blender should be disassembled and thoroughly cleaned as instructed in "Care and Cleaning."
