Introduction

Important safety precautions

Cleaning – Unplug the AC power adapter from the AC outlet before cleaning the product. Use a damp cloth to clean the product. Do not use liquid cleaners or aerosol cleaners.

۲

- Use a soft damp cloth to gently wipe the product when it is dirty. To protect the product, do not use a chemical cloth to clean it. Chemicals may cause damage or cracks in the casing of the product.
 Water and moisture - Do not use the product near water, such as bathtub, washbasin, kitchen sink, laundry tub, swimming pool and in
- Water and moisture—bo not use the product hear water, such as bathtub, washbasin, kitchen sink, laundry tub, swinnning pool and it a wet basement.
- Do not place vases or any other water-filled containers on this product. The water may spill onto the product causing fire or electric shock.
- Stand—Do not place the product on an unstable cart, stand, tripod or table. Doing so can cause the product to fall, resulting in serious personal injuries as well as damage to the product. Use only a cart, stand, tripod, or table recommended by the manufacturer or sold with the product.
- When relocating the product placed on a cart, it must be moved with utmost care. Sudden stops, excessive
 force and uneven floor surface can cause the product to fall from the cart.
- Ventilation The vents and other openings in the casing are designed for ventilation. Do not cover or block
 these vents and openings since insufficient ventilation can cause overheating and/or shorten the life of the
 product. Do not place the product on a bed, sofa, rug or other similar surface, since they can block ventilation
 openings. This product is not designed for built-in installation; do not place the product in an enclosed place
 such as a bookcase or rack, unless proper ventilation is provided or the manufacturer's instructions are
 followed.
- Heat sources—Keep the product away from heat sources such as radiators, heaters, stoves and other heatgenerating products (including amplifiers).
- To prevent fire, never place any type of candle or naked flames on the top or near the product.
- To prevent fire or shock hazard, do not place the AC power adapter under the product or other heavy items.
 The product uses power even in Standby. Unplug the product from the AC outlet when you are not using it.
- Servicing—Do not attempt to service the product yourself. Removing covers can expose you to high voltage and other dangerous conditions. Request a qualified person to perform servicing.

Devices connected to the protective earthing of the building installation through the MAINS connection or through other devices with a connection to protective earthing and to a television distribution system using coaxial cable, may in some circumstances create a fire hazard. Connection to a television distribution system therefore has to be provided through a device providing electrical isolation within a certain frequency range (galvanic isolator, see EN 60728-11).

۲

For requirements in Norway and Sweden, the requirements for isolation are also relevant for devices that can be connected to television distribution systems.

Preparation

Inserting the batteries

Before using the Receiver for the first time, insert the two supplied "AAA" size zinc-carbon batteries. When the batteries become depleted and the remote control unit fails to operate, replace the batteries with new "AAA" size batteries.

۲

1 Open the battery cover.

- 2 Insert the two supplied "AAA" size zinccarbon batteries.
 - Place batteries with their terminals corresponding to the (+) and (-) indications in the battery compartment.
- 3 Close the battery cover.

CAUTION

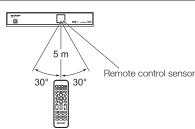

- Improper use of batteries can result in chemical leakage or explosion. Be sure to follow the instructions below.
- Do not mix batteries of different types. Different types of batteries have different characteristics.
 Do not mix old and new batteries. Mixing old and new batteries can shorten the life of new batteries or cause chemical leakage in old batteries.
- Remove batteries as soon as they have worn out. Chemicals that leak from batteries can cause a rash. If you find any chemical leakage, wipe thoroughly with a cloth. The batteries supplied with this product may have a shorter life expectancy due to storage conditions.
- If you will not be using the remote control unit for an extended period of time, remove the batteries from it. When replacing the batteries, use zinc-carbon batteries instead of alkaline ones.

Note on disposing batteries:

The batteries provided contain no harmful materials such as cadmium, lead or mercury. Regulations concerning used batteries stipulate that batteries may no longer be thrown out with the household rubbish. Deposit any used batteries free of charge into the designated collection containers set up at commercial businesses

Using the remote control unit

Use the remote control unit by pointing it towards the front of the Receiver. Objects between the remote control unit and sensor may prevent proper operation.

Cautions regarding the remote control unit

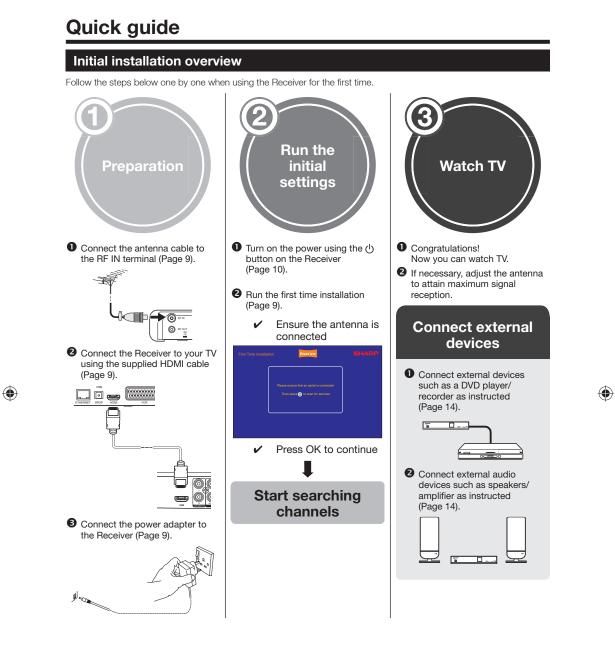

- Do not expose the remote control unit to shock. In addition, do not expose the remote control unit to liquids, and do not place in an area with high humidity.
- · Do not place the remote control unit under direct sunlight. The heat may cause deformation of the unit.
- The remote control unit may not work properly if the remote control sensor of the Receiver is under direct sunlight or strong lighting. In such cases, change the angle of the lighting or the Receiver, or operate the remote control unit closer to the remote control sensor.

Quick guide

Before turning on the power

- \blacksquare Connect the antenna (standard DIN45325 plug (IEC 169-2) 75 Ω coaxial cable)
- 2 Connect the HDMI cable3 Connect the power adapter

Initial auto installation

When the Receiver is powered on for the first time after purchase, the first time installation screen appears. Follow the on-screen instructions to search for all available channels.

Confirm the following before turning on the power

- Is the antenna cable connected?Is the power adapter connected and plugged in?
- Is the HDMI cable connected between the Receiver and your TV?
- **1** Press () on the Receiver.
- The first time installation screen is displayed.
- 2 Ensure the antenna cable is connected.
- Press OK to start the channel search.
 The Receiver will search for, sort and store all receivable channels.

NOTE

۲

- The first time installation process will be aborted if the Receiver is left unattended for more than 30 minutes before searching for channels.
 After the first time installation has been completed, the
- After the first time installation has been completed, the default PIN is automatically set to '0000'. To change the PIN setting, refer to Page 20.

and keep the power plug within

reach.

Daily operation

Switching on/off

Standby mode

Select standby mode

If the Receiver is switched on, you can switch it to standby by pressing () on the remote control unit.

Switching on from standby

From standby, press 🕐 on the remote control unit.

NOTE

- If you are not going to use this Receiver for long periods of time, be sure to remove the power adapter from the supply. (Page 9).
- A small amount of electric power is still consumed with the Receiver in standby mode.

Adjusting the volume

Press the **VOL+** button to increase the volume and the **VOL-** button to decrease the volume.

Changing channels

Channel List

Basic operation

Display/close the Channel List

1 Press CH.LIST

Navigating the Channel List

1 Select a channel

Press $\blacktriangle/\blacksquare$ to select a channel. Press **OK** to watch the current programme.

Useful functions

2 Lock a channel

You can lock a channel to prevent children viewing scenes of a violent or sexual nature.

- 1 Press \blacktriangle/∇ to select the channel you want to lock.
- **2** Press the red coloured button. A padlock icon will appear next to the channel name.

NOTE

۲

- If parental controls are enabled (Page 20), the parental settings PIN must be entered before a channel can be locked/unlocked.
- To unlock a channel, select the channel using the Δ/Ψ buttons and press the red coloured button.

③ Set a channel as a favourite

You can set a channel as a favourite for quick access. All favourite channels will be displayed in the favourites list.

- 1 Press \blacktriangle/V to select the channel you want to add to the favourites list.
- Press the green coloured button.
 The favourites list will be shown listing all favourite channels and the channel you have just added.
 - Press < to return to the channel list.
- NOTE

3

1

۲

 To delete a channel from the favourites list, press the yellow coloured button. You can choose to delete the channel or cancel.

(4) Deleting a channel

- 1 Press ▲/▼ to select the channel you want to delete.
- Press the yellow coloured button.
 The delete channel screen will be displayed. You can choose to delete the channel or cancel.

NOTE

 To view a channel once it has been deleted, you will need to perform a first time installation (Page 9).

(5) Viewing the Favourites List

- Press ► to view the favourites list
 While viewing the favourite list, you can select and watch channels in the same way as the Channel List.
- 2 Press < to return to the channel list.

6 View the EPG

1 To view the **EPG** (Page 12), press the blue coloured button.

۲

Watching TV

Selecting a programme using the EPG

Basic operation

Display/close the EPG screen Press GUIDE.

Select a programme

1 Select the time span

Press \blacktriangleleft / \blacktriangleright to select the time span you want to search.

 Continue to press ▶ to display the programmes in the next time span.

2 Select the desired programme

Press ▲/▼ to select the desired programme.
If ▲ or ▼ are displayed on the left of the services, continue to Press ▲ / ▼ to display the next or previous screen.

Useful functions

۲

③ Navigate the time span

- **1** Press the red coloured button to move backwards 2 hours.
- 2 Press the green coloured button to move forwards 2 hours.
- **3** Press the yellow coloured button to move backwards 24 hours.
- 4 Press the blue coloured button to move forwards 24 hours.

Watch a programme

(4) Watch a programme now

- **1** Press $\blacktriangle / \blacksquare$ to select a programme.
- 2 Press **OK** to watch the programme.
- **(5)** Set a reminder for a programme
- 1 Press ▲ / ▼/ ◀ / ► to select a future programme.
- **2** Press **OK**. A clock icon will be shown next to the selected programme.

NOTE

 If you set a reminder, just before the programme start time, a message will appear reminding you that the programme is about to start. You can choose to automatically switch channels or cancel the reminder.

Digital text

What is digital text?

Some channels are broadcast with digital text which contains pages of information and entertainment. News, weather, sports information, stock exchange prices and programme previews are among the many services.

Accessing digital text

- **1** Select a channel which broadcasts digital text.
- 2 Press TEXT or the RED button.
 - Not all channels broadcast digital text.You may not be able to receive digital text if you have a
 - poor quality signal.

Buttons for digital text operation

Buttons	Description
▲ / ▼ / ◄ /►	Navigate the digital text index page and menu system
Coloured buttons	Access digital text shortcuts. These are often displayed on the bottom of the page.
Numeric buttons 0–9	Directly select a page.
EXIT / TEXT	Exit digital text.

TU-T2_GB.indd 12

Connecting external devices

Before connecting ...

- Be sure to turn off the Receiver and any external equipment before making connections.
 Firmly connect a cable to a terminal or socket.
- Carefully read the operation manual of each external device for possible connection types. This also helps you get the best audiovisual quality to maximise the potential of the Receiver and the connected device. •

۲

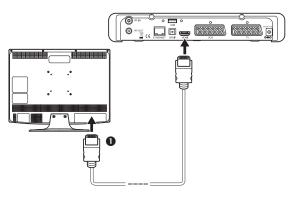

NOTE
The cables illustrated in pages 13 to 15 are commercially available items.

Video connections

HDMI connection

Example of connectable devices HD Ready TV

The HDMI connection permits digital video and audio transmission via a connection cable to a TV. The digital picture and sound data are transmitted without data compression and therefore lose none of their quality. Analogue to digital conversion is no longer necessary in any connected devices, which would also result in quality losses.

Adjusts the video resolution when the Receiver is connected to your TV using a HDMI cable. This allows you to watch High Definition (HD) TV.

Item		
576p	Sets the video resolution to 576p.	
720p	Sets the video resolution to 720p.	
1080i	Sets the video resolution to 1080i.	
1080p	Sets the video resolution to 1080p.	

NOTE

- Consult the documentation supplied with your TV to select the
- correct TV resolution. If your TV is not HD Ready but has a HDMI socket, select the 576p video resolution.

AV Settings **HDMI** Audio Adjusts the audio output type when the Receiver is

connected to surround sound system using a HDMI cable. This allows you to enjoy realistic live sound.

	Item
Stereo	The Receiver will output Stereo sound when connected to a standard surround sound system using the HDMI cable.
Dolby Digital	The Receiver will output Dolby Digital surround sound when connected to a compatible surround sound system using the HDMI cable.

NOTE

- Only select Dolby Digital if you have a compatible surround sound system. If you choose this setting with a non-compatible sound system the audio will not be heard.
- Not all channels are broadcast with Dolby Digital sound.

Adjusts the video signal type when the Receiver is connected to your TV using a SCART cable.

Item		
RGB	This selects an RGB video signal type. The video signal will be splits the video output into separate red, green and blue signals to provide the best picture quality.	
Composite	This selects a composite video signal. Produces a single composite video signal which provides poor picture quality.	

NOTE

۲

If your TV is not compatible with RGB signals, select the Composite video output.

Adjusts the screen size (aspect ratio) between 16:9 widescreen and various 4:3 picture sizes.

Item		
16:9 Widescreen	Displays a 16:9 widescreen picture. This ensures the best aspect ratio for widescreen TVs.	
4:3 Widescreen (16:9)	In this mode, the picture is stretched towards each side of the screen. This displays a picture similar to 16:9 widescreen on 4:3 TVs.	
4:3 Centre Cut Out	Displays a 4:3 picture in the centre of the screen. With some programmes, bars may appear on the left and right hand side of the screen.	
4:3 Letterbox (16:9)	Displays a 16:9 picture in the centre of the screen. With some programmes, bars may appear on the top and bottom of the screen.	

NOTE

- If you have connected the Receiver to a Widescreen TV, you
- should select the 16:9 Widescreen setting. The wide mode feature lets you adjust the screen size using the • WIDE button on the remote control unit. Press WIDE to cycle through the available screen sizes while watching TV.
- If you have selected 16:9 widescreen in the AV settings menu, the wide mode will have no effect. ٠

Troubleshooting

The following conditions in the table below do not always indicate a problem. Please perform the checks described below before calling for service. If the problem can not be corrected by the use of this manual, remove the mains plug from the power socket and contact the Helpline on 0845 880 0421 in order to obtain service or advice. Where this is not possible please visit our web site www.sharp.co.uk/customersupport.aspx

۲

Customers without Internet access may phone 0845 880 0421 during office hours. In the unlikely event of this equipment requiring repair during the guarantee period, you will need to provide proof of purchase to the repair company. Please keep your purchase invoice or receipt in a safe place.

WARNING

Under no circumstances should you try and repair this product yourself. This will invalidate the warranty. Do not open the unit as there is risk of electric shock.

Problem	Possible solution	
No power.	 Check if you pressed () on the remote control unit. Is the AC power adapter disconnected? Check if you pressed () on the Receiver. 	
The Receiver cannot be operated.	 External influences such as lightning, static electricity, etc., may cause improper operation. In this case, operate the Receiver after first turning off the power, or unplugging the AC power adapter and re-plugging it in after one or two minutes. 	
Remote control unit does not operate.	 Are batteries inserted with polarity (+, -) aligned? Are batteries worn out? (Replace with new batteries.) Are you using it under strong or fluorescent lighting? Is a fluorescent light illuminating the remote control sensor? 	
Picture is cut off.	Are screen mode adjustments (WIDE MODE) such as picture size made correctly? (Page 17)	
Power is suddenly turned off.	The Receiver's internal temperature has increased. Remove any objects blocking the vent or clean. Is auto standby activated? (Page 21)	
No picture.	 Are connections to external equipment correct? (Pages 13 to 15) Is the input signal type selected correctly after connection? (Page 17) Is the correct output source selected? (Page 10) Is the antenna connected properly? (Page 9) Hold the HDMI button on the remote control for 5 seconds to reset the output to 1080i. (Page 17) 	
No sound.	Is the volume too low?Check if you pressed mute on the remote control unit.	
 The Receiver sometimes makes a cracking sound. 	 This is not a malfunction. This happens when the casing slightly expands and contracts according to changes in temperature. This does not affect the Receiver's performance. 	
Freezing / Blocking	 Check Freeview reception information as we have listed on the front of the manual. Refer to the page 21 and 22 to perform the First Time Installation. 	
There is noise interference on the TV while a broadcast is being received.	 Depending on the reception of the broadcast, interference may appear on the picture while you watch a TV broadcast and the unit is left on. This is not a malfunction of the unit. 	

Cautions regarding use in high and low temperature environments
When the Receiver is used in a low temperature space (e.g., room, office), the picture may leave trails or appear slightly delayed. This is not a malfunction, and the Receiver will recover when the temperature returns to normal.
Do not leave the Receiver in a hot or cold location. Also, do not leave the Receiver in a location exposed to direct sunlight or near a host or cold location. heater.

End of life disposal

Attention: Your product is marked with this symbol. It means that used electrical and electrical and electronic products should not be mixed with general household waste. There is a separate collection system for these products.

A. Information on Disposal for Users (private households)

۲

1. In the European Union

Attention: If you want to dispose of this equipment, please do not use the ordinary dust bin!

Used electrical and electronic equipment must be treated separately and in accordance with legislation that requires proper treatment, recovery and recycling of used electrical and electronic equipment. Following the implementation by member states, private households within the EU states may return their used electrical and electronic equipment to designated collection facilities free of charge*. In some countries* your local retailer may also take back your old product free of charge if you purchase a similar new one. *) Please contact your local authority for further details.

If your used electrical or electronic equipment has batteries or accumulators, please dispose of these separately beforehand according to local requirements.

By disposing of this product correctly you will help ensure that the waste undergoes the necessary treatment, recovery and recycling and thus prevent potential negative effects on the environment and human health which could otherwise arise due to inappropriate waste handling.

2. In other Countries outside the EU

If you wish to discard this product, please contact your local authorities and ask for the correct method of disposal.

For Switzerland: Used electrical or electronic equipment can be returned free of charge to the dealer, even if you don't purchase a new product. Further collection facilities are listed on the homepage of www.swico.ch or www.sens.ch.

B. Information on Disposal for Business Users

1. In the European Union

If the product is used for business purposes and you want to discard it:

Please contact your SHARP dealer who will inform you about the take-back of the product. You might be charged for the costs arising from take-back and recycling. Small products (and small amounts) might be taken back by your local collection facilities.

For Spain: Please contact the established collection system or your local authority for take-back of your used products.

2. In other Countries outside the EU

If you wish to discard of this product, please contact your local authorities and ask for the correct method of disposal.

Pb

For EU: The crossed-out wheeled bin implies that used batteries should not be put to the general household wastel There is a separate collection system for used batteries, to allow proper treatment and recycling in accordance with legislation. Please contact your local authority for details on the collection and recycling schemes.

For Switzerland: The used battery is to be returned to the selling point.

For other non-EU countries: Please contact your local authority for correct method of disposal of the used battery.

Important Notice

Digital Switchover and Your TV Equipment

WHAT YOU NEED TO DO TO ENJOY WATCHING TV DURING AND FOLLOWING DIGITAL SWITCHOVER

Starting in 2008 and ending in 2012, television services in the UK will go completely digital, TV region by TV region.

To continue using this digital TV equipment during and following digital switchover, you will need to "reset" your digital TV channels.

۲

Users of this product must reset their channels on at least 2 different occasions, normally 1 month apart when switchover happens. Digital UK, the body leading digital TV switchover, and broadcasters will advise you when to reset your channels on each occasion.

If you do not reset your channels, you risk losing some or all of your TV services during and following switchover.

Please refer to pages 21 and 22.0f this manual for help with resetting channels.

Please note that in order to receive the maximum number of available TV services on your equipment you must preform a first time installation and do not just add channels.

If you have questions relating to digital switchover please don't hesitate to call us on 0845 6 50 50 50. or visit www.digitaluk.co.uk.

The FREEVIEW service is subject to coverage. An aerial upgrade may be required. The FREEVIEW PLAYBACK word and logo are trade marks of DTV Services Ltd and are used under licence. © DTV Services Ltd 2006.
